Preface to Second Edition

I feel encouraged by the widespread response from students and co teachers in astrology who have gone through the first edition.

I am presenting this second edition, thoroughly revised with few additions for an easy insight into the subject.

All possible efforts have been taken to improve the usefulness of the book. The feedback received from different sources has been taken care.

Students are requested to go through the “Preface” to the First edition also in the next pages for a deeper understanding of the origin of K P System of Astrology.

In this edition - new chapter on Manual procedure for Casting of Birth chart in K P System is included. Every student of astrology must know the manual process of casting a Birth chart mainly to understand the value of good and bad times the native is undergoing at the time of astrological consultations. This is known only by practice. We know such experiences - around two decades back - when there was no proper astrological software for casting of birth charts. Today - those who are conversant with the manual process of casting of birth chart can easily trace the errors, if any, in computer output.

Other highlights are (1) Subject matter has been developed and refined in the light of K P principles, (ii) imbedded Vedic astrology back ground has been meaningfully explained (iii) new case studies added for exercises, (iv) every care is taken to minimize number of pages in view of the raising cost factor.

Needless to mention - that in astrology - research is a continuous process - because with every birth chart a new SOUL is landing on this planet. Every Soul has come with a different KARMIC DEBT. By this we can see that many men are similar but not identical in their behavior.

Moreover, every native is facing complex and complicated socio economic conditions for his survival. Astrologer need to decode the birth chart amidst ever changing socio-economic conditions. This needs a constant research on the part of astrologer.

I am grateful to all those who have helped me in this revised edition.

I always believe that there is always a scope for improvement - mainly in astrological studies. I, therefore, with that every student will continue to do research whenever they decode a birth chart.
