---

I am happy to write the following few words on a book on K.P.Astrology by Daivagna Siromani Shri. P.V.K.Punneswara Rao. The octogenarian author is well known for around six decades of experience in astrological field and needs no introduction.

After a formal induction to the field of traditional Hindu system of astrology, the author is meticulously practising predictive astrology of KP system. During his experience of more than half-a-century he has come across amazing results in K.P.System since 1984.

The author is also known for his dedication to teach different systems of astrology for more than three decades and more specifically in conducting classes in K.P.System regularly at Hyderabad and on special requests at other places.

The author has lucidly explained, in this book, the main requirements of K.P.System like significators, ruling planets, timing of events etc. The book is made more as a guiding torch with various real charts, as example, culled out of his practical astrological experience in K.P.System.

The author has, in fact, codified his wide experience in applying the principles of K.P.System to the present socio-economic cultural background by giving examples of case studies on different aspects of human life. One of the specialities of this book is inclusion of author's specific observations in supplementing the original principles laid down by late Prof. Krishnamurthy. As such this book is a valuable contribution to the field of K.P.System.

I pray almighty to bestow healthy and active life to this great author to bring out further books on K.P.System and on other systems of astrology especially by narrating his experiences in practically applying the laid down principles of different systems of predictive astrology.

C.Sambasiva Rao
