FOREWORD

I feel honoured in writing these few words about the book "CANCER VYADHI NIVARANALO JYOTISHYAM" in Telugu by Smt.Akella Saraswati and Shri.Akella Krishna Murthy M.A., (Astrology); M.A.,(Philosophy); K.P.Jyotishya Siromani, Vasthu Siromani, Sankhya Sastra Siromani. This book is a Telugu translation of the English book titled "ASTROLOGY FOR OVERCOMING CANCER" by Smt.Mridula Trivedi and Sri.T.P.Trivedi. By this translation, our authors have made available a highly specialized knowledge on Cancer disease to the students of Medical Astrology.

Shri.Akella Krishna Murthy is a famous author in the subject of Astrology and needs no introduction. In medical astrology, his earlier book titled "Vaidya Jyotishyam" is a remarkable contribution. He is also known for his research studies, since few years, in Medical Astrology with a specialization on Cancer disease.

In his earlier book, Shri.Krishna Murthy has exhaustively dealt with the subject of Medical Astrology. The author, along with his wife, has now chosen a specialized topic of overcoming the dreadful 'Cancer disease'. The use of Astrological principles is very much highlighted in this book. Smt.Dr.Akella Saraswati's contribution is aptly *potencised* in this book as a Medical Doctor by profession with specialization in Medical astrology.

Coming to the disease of Cancer – it is a complex disease caused by interactions of multiple factors such as genetic predisposition, environmental and lifestyle influences, infectious agents and ageing etc. ..Despite the dedicated research all over the globe, since the beginning of the medicine, this disease still remains as one of the biggest killer of the current century. After heart disease, the second most important cause of majority of deaths worldwide is **Cancer**.

Yet, in a contrary direction, the age old Vedic astrology and the ancient Ayurvedic literature, from India, indicates "no fears" in diagnosing/ preventing/ treating this disease. Ayurvedic system of medicine is

however getting revived, of late, as a supplementary / as an alternate therapy for those diseases left uncured by allopathic system.

In this context, the need of reviving Medical Astrology with specialization in Cancer disease is highly essential and a need of the hour. In Medical astrology this Cancer disease can be foreseen and prevented / cured at a right time while decoding the birth charts. Thus this book is a timely option of the authors.

- **This book is now HANDY one with all the clues in reading a birth chart for diagnosis of Cancer disease.**
- **The book is, partly, a compilation of a varied number of articles from eminent authors of the past few decades. These articles reveals and reminds the past glory of Vedic Astrology and Ayurvedic system of medicine and remedial measures thereon.**
- **The book also narrated a number of planetary configurations for diagnosing the disease and the part(s) of the body damaged or likely to be damaged.**
- **The book has also referred to the needy remedial methods to pacify various planets by japa, homa etc.,**
- **Good number of case studies with real birth chart analysis is included which cover real cases of cancer in different parts of the body.**

This book, in short, is worth to collaborate the astrological studies with the clinical diagnosis methods in diagnosing, preventing and curing the dreadful Cancer disease.

I pray, Almighty, to bestow all energies on Smt.Akella Saraswati and Shri Akella Krishna Murthy and all their family members to cherish their abundant desires in authoring on many more variety of topics in Astrology./ Medical astrology etc.,

(C. Sambasiva Rao)
